

Report on WildRoots lecture session - IUCN Youth Climate & Conservation Fellowship Programme in collaboration with Central Research Committee

Organised by – Department of Botany and Geography

Date – 4.06.26

Venue – Room 309

Time – 10.30 am - 2pm

Number of Participants – Students – 20 (Semesters II, Geography Major and Semester II and IV Botany , Major)

Resource Person: Dr. Biswajit De, Founder Director, WildRoots Nature Conservation Foundation (WNCF) India

Teacher Coordinators : 2

Brief Description of the Event

The lecture session by Dr. Biswajit De, Founder Director, WildRoots focused on guiding participants in developing their own service-based environmental projects. Dr. De encouraged the students to identify local environmental issues and transform them into practical, community-oriented action plans.

The session was highly interactive, with discussions on sustainability, conservation, and the importance of individual responsibility towards the environment. Participants received constructive idea at every stage of project planning, from refining ideas to understanding their long-term impact.

Learning Outcome

The lecture as a part of Young Climate Change Fellowship Programme successfully blended theoretical learning with practical exposure, encouraging participants to think critically about environmental challenges while equipping them with the skills to contribute through meaningful action.
