

Report on World Environment Day

Department of Geography

JUNE 2026

Organised by – Department of Geography

Date – 19.06.2026

Venue –Shri Shikshayatan College, Kolkata

Time – 11:40am-1pm

Number of Participants – Students – 25 (Semesters II, Geography Major)

Teachers: 4

Brief Description of the Event

The Department of Geography successfully organized a World Environment Day Exhibition on 19th June to promote environmental awareness and encourage sustainable practices among students. The exhibition provided a platform for students to creatively showcase their understanding of pressing environmental issues and possible solutions.

A total of six groups each containing 10 students participated in the exhibition, each presenting innovative projects related to environmental conservation and sustainability. The exhibits covered a wide range of themes, including waste management, climate change, recycling, and environmental education.

One of the major attractions of the exhibition was a documentary prepared by a student group highlighting contemporary environmental challenges, human impacts on ecosystems, and the importance of collective action for environmental and wild life protection. Students also presented global warming models and informative charts illustrating the causes, impacts, and possible mitigation strategies related to climate change. Another notable feature of the exhibition was the display of DIY handmade products created from recycled plastic materials. These innovative products showcased how waste materials can be transformed into useful and decorative items, encouraging the principles of reuse and recycling.

Learning outcomes:

The event successfully fostered environmental consciousness and inspired attendees to adopt eco-friendly practices in their daily lives. It developed a deeper understanding of contemporary environmental issues such as climate change, pollution, waste management, and sustainable development and to learn the importance of waste segregation and responsible waste disposal.

practices for maintaining a healthy environment. The exhibition enhanced awareness about global warming, its causes, impacts, and possible mitigation measures.
